

Nucleus Network Education partners with leading providers of clinical research training to provide customised Australian courses with a global perspective.

All courses are delivered by a faculty of accredited and certified trainers who have demonstrated their high level of knowledge and application of ICH Guidelines, TGA, FDA and EU regulations.

Think Globally – Act Locally

Nucleus Network Education, in conjunction with ClinfoSource, now offers courses for those who cannot attend a classroom course or who prefer training at a different time to a scheduled course. The classroom and online courses provide a complimentary suite of courses to support studies at a more advanced course level. The different formats also provide a varied learning experience

There are five complete certificate **online** courses:

1. Site Personnel – Core Training
2. Site Personnel – Advanced Training I
3. Sponsor/CRO – Core Training
4. Sponsor/CRO – Advanced Training I
5. Site/Sponsor/CRO – Advanced Training II

Alternatively there are over 50 individual modules to choose.

Standard Operating Procedures:

A set of SOPs for Clinical Research Sites was released to public hospitals and research institutions in Victoria in December 2007. The Victorian Managed Insurance Authority (VMIA) in conjunction with Nucleus Network has developed a generic set of SOPs to assist these institutions to comply with regulatory requirements and GCP guidelines. The SOPs are available **free of charge** at <http://www.vmia.vic.gov.au>
